About the CRO Rally Courses	21

General Information

Welcome to Cyber Rally-O! These Rules and Guidelines pertain to the CRO Rally Divisions. (For the Dance Division and Juniors Division, please see the “Dance Division Rules and Guidelines” and the “Juniors Rules and Guidelines”.)

Earn rally titles, including championships, in each of five levels of fun and challenging rally-o. You can do this without travel and without taking your dog into a trial environment. Shy or reactive dogs and handlers with ring nerves can show in a relaxed, comfortable area of their own choosing.

ALL teams are welcome to enjoy this experience. Dogs and/or handlers with physical challenges will find Cyber Rally-O to be flexible and accommodating.

All forms and documents you will need are posted on the CRO website (www.cyberrally-o.com).

Join the Facebook group and/or the Yahoo group. Search in either place for Cyber Rally-O.

How to Register

Dogs must be registered to participate. Complete the Registration Form and follow the instructions on the form.

Your registration will be processed and your number assigned by e-mail within a week. Each dog needs a separate registration number. Registrations are permanent and do not require renewal. A single registration is good for all CRO Divisions.

The cost of registration is \$15 for each dog. (NOTE: Dogs registered with All Dogs Parkour can register with CRO without charge. Dogs who register with CRO may register with All Dogs Parkour without charge.)

How to Send an Entry

Work at your own pace on the courses you choose. After you have videoed a good run, upload the clip of your run to YouTube or Vimeo.

Complete an Entry Form for each dog. If you are doing multiple entries for the same dog, you can indicate the number of entries on a single Entry Form. Make payment by PayPal at www.paypal.com.

NOTE: for multiple entries, send a single PayPal payment with the total discounted amount of entry fees for all dogs/entries.

Entry fees are \$20 for one run, \$35 for two runs submitted at the same time, and \$45 for three runs submitted at the same time. Retries for an NQd run are \$10, provided the retry is submitted within 30 days of the NQ email.

Here are the multiple entry discount rules:

- Multiple entries for one dog must be at the level(s) for which the dog is qualified. For example, the dog has a Level II title and enters a Level III course plus a Level I course towards a Level I championship title. You may not enter a Level III course and a Level IV course because the dog is not eligible for Level IV until attaining the Level III title.
- You may mix rally and dance entries for the same dog and get the discount.
- Multiple entries for dogs registered to the same handler are permitted but each dog's entries must be at the level(s) for which the dog is qualified.
- If you are submitting more than 3 runs at the same time, each additional entry is \$15.

Send an email with the entry form as an attachment to entries@cyberrally-o.com. In the e-mail, include the YouTube or Vimeo link(s) to the video clip(s) of the following:

1. Dog's equipment (on or off the dog)
2. Course walk
3. Team negotiating the course

Entries are acknowledged by e-mail within a week. Results are emailed within two weeks.

Divisions

There are two rally Divisions: Performance and Traditional. Teams may enter either or both Divisions but must complete a title at each of the lower levels of the Division in order to enter a higher level of that Division. Earning titles at higher levels of either Division does not preclude the team from entering the lower levels of the other Division.

Level I courses are the same for both Divisions. Courses in Levels II through V are different for each Division.

The Performance Division courses will include all the Cyber Rally-O signs. The dogs will work on both the left side (Heel) and the right side (Side) of the handler in Levels II through V. Courses will include transition signs which require the dog to switch from Heel to Side position (or Side to Heel position).

The Traditional Division will not include transition signs on any of the courses. In the Traditional Division, teams will start each course in either Heel or Side position (handler's choice) and will complete the course using that position. Teams may choose to do some courses in Heel position and others in Side position, but none of the Traditional Division courses will require changing sides during the course.

Courses and Levels

There are five levels of courses (I, II, III, IV, and V). Each team must start with Level I. After obtaining a Level I title, the team may move on to Level II and may also continue in Level I to earn a Level I championship title. Moving up does not preclude a team from continuing to earn titles at the lower levels.

The requirement to enter any level (except Level I) in either Division is to have earned a title at each of the previous levels in that Division.

Courses are posted on the CRO website (www.cyberrally-o.com) as they become available. Teams may choose from among the courses but may only qualify with a particular course once each calendar year except

that teams doing Level I courses in either Division and Levels II through V in the Traditional Division may qualify with the same course in the same calendar year provided one run is with the dog in Heel position and the other run is with the dog in Side position. Teams must choose a course that is listed for the level entered. For example, Level I entries must run on Level I courses.

Courses at Levels II through V will include exercises from the lower levels.

Teams may begin the course with the dog working on the left side (Heel) or the right side (Side) of the handler. Signs and courses are designed to be bi-lateral. The team must be consistent in choice of sides for the course the team is running. For example, if a team begins the course in Heel position, the team must complete the course in Heel position (except for transition signs in the Performance Division).

Transition signs indicate that the dog is to switch sides (from Heel to Side or from Side to Heel) and continue to work on that side until the next transition sign. Unless specified on the sign, the dog or handler can transition with any move or series of moves, including single/multiple leg weaves by the dog. Transition signs appear in Levels II through Level V in the Performance Division. No transition signs are used in the Traditional Division.

While on the course, handlers are encouraged to interact with their dogs. **Verbal and/or hand/body cues are allowed. There is no penalty for multiple cues.**

IF THERE IS A DISCREPANCY BETWEEN THE COURSE MAP AND THE LIST OF EXERCISE STATIONS, THE MAP TAKES PRECEDENCE AND YOU MUST DO YOUR RUN ACCORDING TO THE MAP. PLEASE NOTIFY CRO OF ANY DISCREPANCIES SO THEY CAN BE FIXED. THANKS!

Rally Titles

Unless the dog has previous titled in other recognized rally venues, three qualifying runs are required for the first title at each level. Dogs with a first level title in a recognized rally venue need only one qualifying run for the CRO-I title. Dogs with a second level title in a recognized rally venue need only two qualifying runs for a CRO-II title. Recognized rally venues

include (but are not limited to) AKC, ASCA, CKC, Rally FrEe, UKC, and WCRL.

If a team wishes to continue in a particular level, they may work towards a championship title at that level. Here is an example:

3 Qs at Level I earns this title: CRO-I

10 Qs (total, not in addition to the first 3) at Level I earns this title: CRO-CH-LI

If the team wishes to continue beyond the Championship title:
10 additional Qs at Level I earns this title: CRO-CH-LI(2)

These additional championship titles are available:

Teams achieving a title at all five levels earn this championship title:
CRO-CH

Teams achieving a championship title at each of the five levels earn a grand championship title: CRO-GrCH

Teams may continue earning championship titles if desired. For example, teams achieving a title at all five levels plus a second title at all five levels earn this title: CRO-CH(2)

Level I titles are identical for both Divisions. In Levels II through V they are differentiated. Titles in the Traditional Division will be preceded by "T-" (T-CRO-II, for example). Titles in the Performance Division will be preceded by "P-" (P-CRO-II, for example).

Certificates and Ribbons

A certificate will be awarded for all titles. Certificates will be e-mailed. Ribbons are optional. A Q ribbon for the team's first Q at each level is available at no charge. Check the option on the entry form. Title rosettes are also available. Title rosette requests and payments are made on the title entry form. Rosettes will be mailed when the team is awarded the title Q (even if on a retry). Additional Q ribbons are \$1.00 each and are sent with the title rosette. **The optional Grand Champion rosettes are FREE and will be mailed anywhere in the world with no surcharge.**

Judging and Qualifying/NQ

Qualifying: Entries will receive either a Q (qualifying run) or NQ (non-qualifying run). For a qualifying rally run, the team must complete all the course stations correctly, in order, without food/toy luring, and within five minutes. Except for distance stations, jumps, trick stations, and transitions, dogs must be in Heel/Side/Front position (as required by each station) during station performance. Teams are expected to improve their Heel/Side/Front position accuracy as they move up the levels. Between stations, dogs should move in proximity to the handler, in either Heel (left side) or Side (right side) position, as required by the course.

NOTE: Generally, for all runs at all levels the dog needs to be in fairly accurate Heel/Side/Front positions to get a qualifying performance of the exercises that include those positions.

Judging guidelines for Heel/Side/Front positions are based on a clock model. For the ideal Front position, the handler stands at the 6 facing the center of the clock. The dog is at the center of the clock facing the handler with head pointing to the 6 and tail pointing to the 12. In Levels III, IV, and V it is acceptable if the tail is pointing between the 10 and the 2. In Levels I and II the dog's tail can be pointing a little beyond but not beyond the 9 and the 3.

In ideal Heel/Side position, the dog stands in the center of the clock facing the 12 and the tail is pointing to the 6 (the handler stands beside the dog). If the tail is angled toward the 8 or the 4, that is acceptable in all levels. More leeway is permitted in the first two levels (tail pointing to the 9 or the 3).

These are general guidelines defining the outer limits of what is an acceptable position. Depending on the quality of the other elements of the run, if most positions on most stations are performed at the outer limits the run may not qualify. It is hard to see perfectly in video and the angles are sometimes distorted. Judges take into account these guidelines on positions and also take into account the other elements of the run as well as video limitations.

Physically Challenged Dogs/Handlers: Dogs and/or handlers with limited physical mobility may request additional time to complete the courses. Dogs in carts and dogs who cannot sit or down comfortably may stand for all Sit/Down signs. Instead of taking the Sit/Down position, the dog will hold the stand for a few seconds for each change of position. Minor movements by the standing dog, including foot movements, will not be penalized. Dogs or handlers who cannot perform a Fast may substitute a Slow for that exercise. Handlers must note the handler's or dog's disability on the entry form or entry e-mail in order for this special judging rule to apply. For other physical challenges, please send an e-mail with suggestions for modifications prior to videoing the entry. It is the policy of CRO to attempt to accommodate all teams with physical challenges.

Start and Finish Signal: Please signal the start and finish of the course by raising a hand overhead as you pass the Start and Finish signs. This allows the judge to mark the start and finish of the run easily when viewing the video.

Food Rewards: Handlers may have food rewards (no toys) in their pockets. No bait bags are to be worn and food is not to be carried in the handlers' hands or mouths. **Handlers may reward their teammates with food after completing any station ending with dog or handler stationary (such as the Stop, Down or Walk Arouds). No rewards are to be given while the team is in motion or immediately after moving stations such as cone exercises or moving turns (180s, 270s, etc.). It is permissible to stop between stations to deliver a food reward (team has left the prior station and not yet reached the next station).**

Petting/Praising: Handlers may pet their dogs at any place where a food reward is permitted (see "Food Rewards" above). Praising is encouraged throughout the course, whether the team is stationary or moving.

Retries: **Each station may be retried one time. There is a specific way to re-try the station. The team must move back a few paces and re-approach the station for the retry. Do not remain at the station and perform the exercise again! That will result in an NQ. You must re-approach the station for the retry. Each station is a single**

performance of the sign. Retrying at the station constitutes doing the exercise or parts of it twice, which is improperly performing the station. NOTE: When retrying a station that is part of a set of coupled stations you may retry the single station by moving back and re-approaching to retry the single station OR you may move back and re-approach to retry the entire set of coupled stations. If you make a mistake on any of the coupled stations when you are doing the retry of the entire set, that is an NQ and you must start the run again.

NOTE: Unless you are repeating an entire set of coupled signs while retrying a station, DO NOT repeat the previous station. That will result in an NQ. Only do the station that you are retrying (or the entire set of coupled signs if choosing that option on a retry of a coupled exercise).

NQs: Non-qualifying runs will be those in which any of the following occurs:

1. Tight leash (only one minor infraction of this is allowed per run). Follow your dog around if necessary until you regain his/her attention). If you get a tight leash twice, start the run again. If you are not sure, save the \$10 retry fee and start the run again!
2. Dog or handler intentionally leaves the ring (four paws out for the dog or both feet out for the handler)
3. Any harsh treatment of the dog
4. Dog biting handler or handler's clothes (or handler biting dog 😊)
5. Handler moving a foot back to aid the dog in a Finish after the dog is in Front position during a "...Finish. Wait." exercise on Levels III, IV, or V courses. Minor foot movements will not NQ a run.
6. Dog stops working for 20 seconds or more
7. Peeing or pooping in the ring
8. Dog appears to be in pain or too stressed to work comfortably
9. Luring the dog with treats or toys at any time during the run or continually begging the dog to perform
10. The dog picks up the retrieve object or a trick prop during a run other than when performing the retrieve station or the trick.
11. The dog picks up the target on the Send to Target stations or at any time while running a course with a Send to Target station.
12. Retries are done without re-approaching the station.

13. Knocking over, moving or stepping over a cone/marker during a cone exercise (handler or dog). However, moving a cone/marker a foot or two in Levels I and II is acceptable. One retry of the station is permitted.
14. Knocking down a jump bar while exiting a jump station (jump exercise already completed). One retry of the station is permitted.
15. Using a jump with a top bar that will not fall if the dog hits it (such as an obedience high jump or a fixed jump object like a box or baby gate).
16. Using a jump height of more than 16”.

If the entry is an NQ, the team will have 30 days from the date of the e-mailed result to submit another video of the same or a different course. The cost of the re-submission is \$10.00.

Dog Equipment

Leashes are optional at all levels. Please consider this option if working in unfenced areas with reactive dogs. Leashes may be any length and may be dropped, shortened, or removed for distance stations, jumps, weaves, etc.

The dog may wear a flat buckle collar, snap collar, properly fitted martingale collar, no collar, body harness (front or rear clip is fine), and/or a service vest. Tags on collars/harnesses are permissible.

The dog may not wear an e-collar, pinch/prong collar, head halter, or slip (“choke”) collar whether chain or otherwise.

The dog may wear a bandana (some dogs are not easily visible on videos depending on color and background), a service or other vest, a coat for warmth or cooling, a Thundershirt, and/or a TTouch wrap. If you have equipment questions, please send an e-mail prior to videoing your run as some other comfort equipment may be permitted.

Rally Equipment and Ring Setup

Ring. The ring can be any size suitable to accommodate the selected course. Please be sure the team has sufficient room to safely and comfortably maneuver the course, especially if there are jumps.

Please mark the corners of the ring with cones, flags, or other visible markers. However, failure to do so will not result in an NQ. An NQ for a dog or handler leaving the ring will be somewhat subjective if the ring is not clearly defined.

Unless the handler has memorized the course, numbering the stations is suggested.

Signs. The Cyber Rally-O signs need not be printed in color or full-size and they need not be placed on stands. If the handler wishes, the signs can lay flat on the ground. Handlers may choose to write directional arrows on their signs or hand-write the signs themselves. Signs from other venues may be used if appropriate for the station and provided the team performs the correct Cyber Rally-O exercise at that station.

Jumps and Jump Heights. Jumps may be of any material and any upright style (no broad jumps), provided that the bar will fall if the dog hits it. The width must accommodate the dog, but no particular width is required.

Dogs may jump at whatever height the handler chooses, but no dog will jump higher than 16 inches. If you wish, for the comfort of the dog, the bar may be laid on the ground and the dog can walk over it. It is also permissible for dogs to walk between the jump standards with no bar (dogs in carts, for example).

Video Requirements and Tips (Requirements are in bold)

1. The video clip must follow the team so the dog is visible at all times. For distance work, keep the camera on the dog.

2. Links to the following three video clips must be submitted on the entry e-mail. Clips may be separate or joined. If joined, please put in this order (but you will not NQ if you mix them up):

a. Video of the dog's equipment (on or off the dog).

b. Video of the ring and signs. While walking the course, the videographer (or handler) will read and video each sign in order. It is optional to state the sign's station number on the course.

c. Video of the team negotiating the course.

3. The video of the team negotiating the course may not be edited in any way.

4. The videographer may zoom and/or pan, but the dog must be visible throughout the clip.

5. Place the camera on a tripod or other stationary object for a good, viewable result.

6. If you are attempting to self-record, make sure all areas of the course are visible and are not too small on the screen to be viewed easily by the judge.

7. Outdoors in the sun, it's best to have the sun at the camera's back. Alternatively, shade the camera with an umbrella.

8. Please review your clips before entering them. If the images are not large enough or are not clear, they can not be viewed for judging.

Thank you for participating in Cyber Rally-O!

RALLY QUESTIONS AND ANSWERS

RALLY JUDGING STANDARDS

Q1. Who will be judging rally?

Answer: The judges are all handlers who have put either a P-CRO-CH or a T-CRO-CH title on their dogs.

Q2. What are the standards to qualify?

Answer: To qualify, perform all stations correctly in the correct order and in five minutes. There is one retry (done a specific way) for each station. See the Rally Rules and Guidelines for more information about Qs and NQs.

Q3. If we make a mistake, can we try the station again?

*Answer: Yes. Each station may be retried once. If that fails, start over and do a new video. If you are retrying a station, **you must leave the station and move back a few steps. Then approach the station and try it again.** Do not do the station twice while in position at the station. That will be an NQ. A proper retry includes approaching the station again. See the Rally Rules and Guidelines.*

Q4. I have physical challenges and cannot do a fast pace. Can my dogs and I still enter?

Answer: Yes. Indicate the issue when sending your entry and you can change a Fast to a Slow on any particular course. CRO is definitely a challenging rally venue, but its policy is to make it accessible to every dog and handler who can get through the courses. You can also choose courses without the Fast signs.

Q5. Are we allowed to practice the course before we video?

Answer: Yes. Practice as much as you want. Some courses, especially at the higher levels, require practice before running them successfully. Remember that every station must be performed correctly.

Q6. If my dog wanders to the end of the leash and it gets tight, is that an NQ?

Answer: One minor infraction of the tight leash rule per run will be overlooked. If you need to, keep the leash loose by following your dog until you can regain his/her attention. If you have a second tight leash incident in the run, start over again. If you are not sure whether the leash looks "tight" or not, try the run again rather than sending it in and risking an NQ and the \$10 retry fee.

EQUIPMENT

Q1. In the YouTube demo video "Cyber Rally-O Level I Course I – Dusty and Jude" (<http://www.youtube.com/watch?v=xOkSgmUlmco>), you used a variety of objects instead of cones for the Serpentine and Spiral. Can we use different objects such as vases in place of cones?

Answer: Yes, you can use anything visible as markers as long as they allow you to perform the stations correctly according to the exercise descriptions.

Q2. I have a full set of AKC rally signs. May I use them instead of printing the CRO signs? Of course, for the stations that don't exist in AKC, I will print the CRO signs.

Answer: Yes, that is fine. As long as the stations are performed according to the CRO exercise descriptions, you can use signs that you have.

Q3. Do we need to use particular sign holders? I have chalk boards on which I can write signs.

Answer: You can use any type of sign holders or you can lay the signs on the ground. As long as the course is performed correctly, you can mark stations any way you prefer.

Q4. Do the signs need to be printed full size? I like to print 4 to a sheet and store each sign in a zip sandwich bag. They are easy to store but big enough to read and they stay dry when working outside.

Answer: No need to print full size. Just be sure to perform the correct exercise at each station on the course.

Q5. May I write on the signs? I find the arrows to be very helpful. Could I draw an arrow on my directional signs so I know which way to go?

Answer: Yes, that is fine. The idea is to complete the course correctly. Go ahead and write on the signs if that is helpful.

Q6. Can the target for the Level 2 Send to Target signs be a square big enough for the dogs to sit or down on?

Answer: Yes. The sign description says the target can be "...any size, large or small..."

Q7. May I use mouse pads as targets? My dog sometimes steals one.

Answer: Mouse pads are fine. But don't let the dog pick up the target. It will be an NQ. If it happens during a run, just start over again.

COURSES

Q1. Do we need to do the courses in the order they are listed?

Answer: Not at all. You select which courses you want to do for each entry.

Q2. Will higher level courses include lower level signs?

Answer: Yes. Level I signs may appear in any other level course. Level III signs may appear in Levels IV and V courses as well as in Level III courses.

Q3. When setting the cones for the Serpentine and Spiral exercises, what should the distance be between each cone?

Answer: The description of the signs says "...with spaces between them of approximately four to eight feet." But if you make them closer or farther, it's fine. Participants are encouraged to set the courses for their own comfort and the comfort of their dogs. If someone is in a wheel chair, or a dog is in a cart, or the dog is tiny or very large, a different spacing may be more suitable. Any way it is set, it shows the skill being performed by the team.

Q4. I saw a discrepancy in the course map and the list of signs. Which is correct – map or list?

Answer: The course map is correct. If there is a discrepancy, it is in the list of signs. Follow the course map and PLEASE notify CRO of any discrepancies so they can be corrected. Thank you!

PERFORMANCE OF SIGNS

Q1. It looks like the dogs can sit or stand in the Call Fronts. Is that right?

Answer: Yes. The dog does not have to sit when called to Front position. The dog may do a Sit or a Stand, but s/he must pause in the position.

Q2. When the team stops on signs that say "Stop", doesn't the dog have to sit? What about finishes?

Answer: No. The dog may sit or stand for the "Stop" unless the sign says, "Stop. (Stand)..." in which case the dog must remain standing. The dog may sit or stand on all Finishes, as well. Sits are always optional unless the sign specifically directs a "Sit." For Stands, be sure your dog pauses with all four feet still. All six feet must be stopped - your feet and the dog's feet - to perform a "Stop" correctly. The same goes for a "Front" and a "Finish. Wait" - all six feet are stopped at the same time.

Q3. Is there a preferred way to perform the transition signs?

Answer: There is no method that is preferred. You need to switch from Heel to Side or Side to Heel, but how you perform the switch is up to you. The transition can be simple or complex.

Q4. Level I, Sign 24, is "Stop (Stand). Walk Around". The description says "The team stops" but I perform this more as a moving stand walk around. Must I pause before walking around?

Answer: The only "Moving" stations are in Levels IV and V. All signs that indicate "Stop" or "Stop (Stand)" require both dog and handler to hold either a Stand at Heel/Side or a Sit at Heel/Side for a moment (pause) before performing the next part of the exercise. If you perform sign 24 as a moving stand or the two Level I "Stop. Down." exercises as moving downs, it is incorrect and an NQ.

Q5. On the Level I "Stop. Down." exercise, does the dog sit and then lie down, like in the traditional Rally "Halt. Down."? Or does the dog stop (standing) and down from a stand?

Answer: In CRO, every "Stop" means the team stops moving and the dog can either stand or sit for the "Stop" (except the Stop [Stand] signs

which require a Stand). So, some teams may perform the "Stop. Down" sign as a Stand to a Down and some as a Sit to a Down. Both will be correct. Be sure to pause in the "Stop" position (whether a Sit or a Stand) before cueing the next position.

Q6. On the Level I "Stop. Down" exercise, does the dog have to hesitate at the Stand position first before I cue her to "down" or can we do a "Drop down" as soon as we hit the sign?

Answer: The dog MUST pause before the Down. The "Stop" in CRO is either a Stand or a Sit (except where required to be a Stand, see next question). There must be a pause in either Stand or Sit before the dog does the Down.

Q7. "Stop (Stand)" means the dog must not sit before the Stand, right?

Answer: Correct. Every "Stop." is an option to sit or stand EXCEPT where the sign says, "Stop. (Stand)" which means the dog does NOT sit and must remain standing when the team stops.

Q8. The descriptions of the Call Front signs say the handler backs up. Is that required if the dog can come to Front without the handler backing up?

Answer: The handler may back up as an aid to the dog and to give the dog the fun of chasing the handler for a few steps into Front position, but it's optional. However, on the Long Call Front exercises, it is required.

Q9. On the Single and Double Serpentine, if the dog is working in Side position, is the entry the same as for Heel position (with the first cone on the left side of the team)? For Spiral Left, would the dog be on the outside?

Answer: The entry is the same whether the dog is in Heel or Side. On the Spiral Left, the dog working in Side will be on the outside of the spirals. That is why the signs do not say "dog outside" or "dog inside". The dog will be outside or inside depending on whether s/he is working in Heel or Side position.

Q10. Why do CRO signs say "Stop" instead of "Halt" and why not have the dogs sit instead of giving the option to stand?

Answer: CRO uses "Stop" instead of "Halt" because to most of us the word "Halt" means for the dog to sit. For teams doing both CRO and freestyle, many handlers do not want the dogs to sit when they stop.

Another reason is that tons of sits on a course are demotivating for many dogs and even uncomfortable for some dogs. So CRO gives the option to stand instead. For teams not doing freestyle and teams doing traditional obedience/rally, the dogs can sit or do a mix of Sits and Stands. Rally is supposed to be fun, and whether a dog can do multiple sits or not does not reflect on the level of attention and team skills. There are some CRO stations that require a Sit, but not too many. Whether your dog does a Stand or a Sit, be sure there is a pause after each Stop or the run will NQ.

Q11. When we do a retry at a station, can we do it in the same place where we stopped to do the station or do we need to go back and approach the station again?

Answer: If you are retrying a station, you MUST leave the station and move back a few steps. Then approach the station and try it again. Do not do the station twice while in position at the station. That will be an NQ. A proper retry includes approaching the station again for a completely fresh start. (REMINDER: Do not do the previous station again; that will result in an NQ.)

VIDEO

Q1. I forgot to raise my hand at the Start line when I was videoing. Is this an NQ?

Answer: No. The handler's raised hand at the start and finish allows the judges to mark the start and finish easily when viewing the video. If you forget, it is not an NQ.

Q2. Exactly what do I need to show in the video of my dog's equipment? I took off her collar to show it was flat buckle. Is that acceptable?

Answer: Yes, that is fine. You can also show it on the dog. You can use the same video clip for all runs using the same equipment.

Q3. To video the signs while walking through the course, do I take the vidcam around and show each sign and say the station number or do I leave the camera on the tripod and then walk without the dog naming the signs as I go.

Answer: Either way is fine. The judges need to make sure the course is set correctly.

Q4. My dog was not completely visible for a second or two during the video clip of the run. You can see most of her, but her tail and butt disappear as she is making a turn. Is that still an acceptable video to send in?

Answer: Yes, it's fine, as long as the judge can see most of the dog and what s/he is doing.

Q5. I want to self-video using a wide angle lens. We will appear to be far away. Can we enter a video like that?

Answer: Sure. But make sure the team appears "large" enough for the judge to easily see the performance at each station. The best angle for a vidcam that is not going to be panned or zoomed is usually in a corner.

MISCELLANEOUS

Q1. Can we use music just to make it fun and for practice in moving to music?

Answer: Music is great. If you do the course to music, be sure to focus on the stations and their proper performance. After you have completed the video, check to make certain everything was performed properly. Music can be a distraction to the handler.

Q2. As a team moves up to the higher levels, is there any "creativity" factor or specific position requirements for the course runs?

Answer: There is no creativity factor in the judging. Basic positions will be Heel, Side, Front – just as in the lower levels, but the exercises to be performed will be more challenging.

Q3. Is there a time limit to complete a title?

Answer: There is no time limit. You can enter whenever it's convenient and you can work at your own pace.

Q4. Can you submit multiple entries at one time, say all runs for Level 1?

Answer: Yes, you can submit multiple entries at the same time, but review the multiple entry discount rules to be certain you only submit entries for which the dog is eligible. Make a single PayPal payment for the total of all multiple entries.

Q5. Are you competing against other dogs in your level?

Answer: You are only competing against the standards for qualifying and the challenges of a particular course. Other teams are not involved.

Q6. Where are the moves executed in relation to the signs?

Answer: In traditional rally, most signs will be on the handler's right and the dog is on the left. In CRO, where dogs may work on both sides, there is no requirement to have the sign on the left or the right. Whichever side you choose for sign placement is fine as long as each station is completed correctly and in order. You can mix sign placement (left and right) on a single course, if that suits you.

Q7. Why are there pairs (or more) of some signs? Should I print both of them?

Answer: Yes, print both. Some courses use two of the same sign.

ABOUT THE CRO RALLY COURSES

Each course has two pages. One page is the course map. The numbers and arrows show the order of the stations, beginning at the Start and ending at the Finish.

The second page is written material about the course. The course signs are listed next to their stations. Next to the sign name is the Level of the sign and its number in the list of signs for that level. For example, “L1-7/8” is Level I, signs 7 and 8. Those two signs are **180° Right** signs. As a second example, “L2-19” is Level II, sign 19, which is the **Dog 360°** sign.

You may choose any of the courses for each of your entries, provided it is a course for the level which you are entering and provided you have not entered and qualified with that course during the current calendar year. For example, if you choose Level 1 – Course 2 and enter and qualify in November, you may not enter again with that course until January. (See the Heel/Side exception for Level I and Traditional courses in the Courses and Levels section of the Rules and Guidelines).

New courses are added from time to time. Some will have more stations that you and your dog enjoy than others. Some will be more challenging than others. At the higher levels, all the courses will present significant challenges.

It is perfectly fine to practice the course you choose until you and your dog can complete it accurately within five minutes. Have fun with your dog and build your teamwork. It’s fun to take on a challenge when you have a great teammate working with you.

Thank you for participating in Cyber Rally-O!!
